

Installation Information Sheet

displaySENSOR—Side Connect

The side connect SENSOR is designed to easily and quickly connect to recoilers [02 Series] utilizing a slotted plug [021305]

This SENSOR is best suited for applications where handsets need to move from one display to another or when the handsets need to be removed at night [kiosk].

The SENSOR can be reused by simply removing the old tape and applying new replacement tape [121245].

Required tools: Removal tool [125011] | Paperclip

Adding to display product

1. Remove tape backing.

2. Apply to product with LED facing up.

3. Press on the top as well as both sides.

4. Insert plug into sensor and display.

Removing from display product

5. Insert paperclip, press down and pull cable.

6. Slide Removal tool [120100] under sensor and break tape bond.

7. Remove old tape and apply a new tape pad [120100].

Install the recoiler so that constant tension is applied to the sensor and your handset will be straight every time!
