

Product Information Sheet

displayRECOILER - 1/4-20 Imperial Slotted Security Nut

This locking hardware will thread and lock into the existing tripod mount on cameras and camcorders.

To improve display quality while the camera is in the seated position install a mounting shoe [045100].

For active electronic security use a curly cord or pressure sensor alarm [050272 OR 050260].

Required tools: Security wrench [125215]

1. Locate tripod mount on camera.

2. Thread set screw into tripod mount.

3. Ensure that Allen hole is facing you.

4. Place supplied washer on set screw.

5. Place supplied lock washer on set screw.

6. Bring security nut through shoe.

7. Thread security nut onto set screw.

8. Turn clockwise until snug.

9. Tighten gently with security wrench.
