

alarmCHARGE RECOILERS

Standard industry **RECOILERS** utilize cable that can be easily cut using a pair of scissors resulting in “**CUT and RUN**” instances. RTF **RECOILERS** use aircraft cable and **cannot be cut with scissors**. Our pre**THEFT** advantage **alarms before** the cable is cut or the **DEVICE** is removed.

clear

black

Mechanical recoilers are available in two colors, various sizes and a wide array of cable thicknesses

Display with CONFIDENCE

RTF has a wide range of **RECOILERS** that can be attached to your displayed products by our line of alarm**CHARGE** and **WISE3** solutions or by **3M VHB** tape.

We provide **electronic** aircraft cable **RECOILERS** that charge and secure the display as well as **mechanical RECOILERS** with many **ENDS** to meet every project.

Product benefits include **reduced theft**, **improved display quality** and **customer interaction**. Your customers see your product and not the **RECOILER**.

- Quick connect/ disconnect **ENDS**
- False alarm friendly, spinning connector
- pre**THEFT ALARM** cable cut technology
- Easy to use and sets up in minutes
- **20 END** and **MOUNT** combinations
- Quickly mounts to all displays or fixtures
- Positive customer interaction, superior security, long life and great value.

display **RECOILER**

Upgradable **ENDS** and **MOUNTS** ensure your investment grows as your requirements change!

Quick Connect **ENDS**

MOUNT

lift+**TOUCH** brings a interactive digital media experience to the customer.
